Erasmus+

Rolling out ESI at ELTE

Ms. Orsolya PÓSCH
Deputy Head, Department of Erasmus+ and International Programmes (ENPO), ELTE
Mr. Dávid RITTER
director and chief information officer, Directorate of Informatics, ELTE

Erasmus+ App webinar for the HEIs - 21/10/2021

THE FACILITATION OF THE DEPLOYMENT

1. Preparation and initiation by ENPO

- Realising the importance of the deployment
- Identifying the players of the process (Directorate of Informatics)
- Collecting the necessary technical information for the implementation
- Contacting the IT department and requesting the deployment

2. Deployment by Directorate of Informatics

- Request from two parallel sources: ENPO and KIFÜ, the Hungarian National Research and Educational Network (NREN)
- Three working days to complete the task

Altogether two/three weeks for facilitation

CHALLENGES AND OPPORTUNITIES

Challenges

- Finding the best possible way to describe the request to the IT department

Opportunities

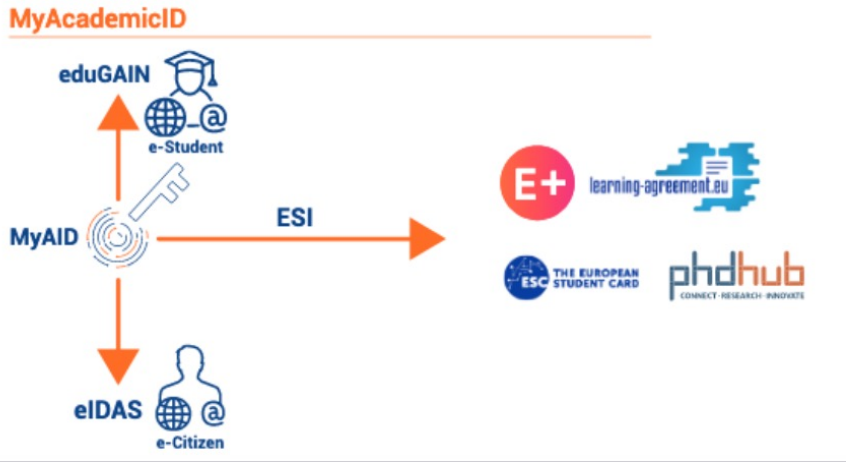
- Effective, well-functioning communication channels
  - established good cooperation between the IRO and the IT department → essential in digitalisation efforts of Erasmus+
- Having proper Identity Providers (IdP) and working operation solutions
  - working with eduGAIN for more than 10 years
  - many of the attributes required by the ESI already enabled

THE OPTIMAL PROCESS OF DEPLOYING THE ESI

The optimal process would be:

1. **The process is initiated by the IRO**
   - finding the right unit that works with identity management
   - providing the necessary instruction for the correct deployment of the ESI
2. **Technical task by the IT department**
   - publication of the necessary parameters towards the eduGAIN federation (ndr. in case the institution has such software)
3. **Share the news with the stakeholders**
   - students, coordinators, student organizations or any other relevant unit at the university

THE IMPORTANCE OF ESI



A landmark towards digitalisation, inclusion and equal access

- Key for the seamless student data flow during the Erasmus+ mobility period
- Proper functioning of the Erasmus+ digital tools, including the Erasmus+ App
- Essential for the creation of the App's Digital European Student Card
- Interoperability and accessibility for the entire EHEA
